BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ **BLACK BORDERS**
- ☐ **IMAGE CUT OFF AT TOP, BOTTOM OR SIDES**
- ☐ **FADED TEXT OR DRAWING**
- ☐ **BLURRED OR ILLEGIBLE TEXT OR DRAWING**
- ☐ **SKEWED/SLANTED IMAGES**
- ☐ **COLOR OR BLACK AND WHITE PHOTOGRAPHS**
- ☐ **GRAY SCALE DOCUMENTS**
- ☐ **LINES OR MARKS ON ORIGINAL DOCUMENT**
- ☐ **REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY**
- ☐ **OTHER:** _____

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.

III. Listing of Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

6. (Canceled)
7. (Canceled)
8. (Previously presented) The method of Claim 11 wherein the forming comprises:
forming the link within the second version, wherein the reference specifies a different location within the paper, wherein the second location is the different location, and wherein the operation includes displaying the different location on the display device as part of the likeness in response to a selection of the first location.
9. (Previously presented) The method of Claim 11 wherein the forming comprises:
forming the link within the second version, wherein the reference specifies an identity of a script, wherein the second location is the script, and wherein the operation includes executing the script in response to a selection of the first location.
10. (Previously presented) The method of Claim 11 wherein the translating comprises:
forming the link within the second version, wherein the reference specifies an address of a website external to the paper, wherein the second location is the website, and wherein the

operation includes displaying the website on the display device in response to a selection of the first location.

11. (Previously presented) A method performed by a computer system, comprising:
 - storing a first version of a mass-produced printed paper;
 - translating the first version into a second version of the paper, the second version being displayable on a display device as a likeness of the paper;
 - in response to the first version, detecting a reference at a first location within the paper, the detected reference being associated with a second location; and
 - in response to the detected reference, forming a link within the second version between the first location and the second location, and the first location being displayable on the display device as part of the likeness and selectable to cause an operation associated with the second location.
12. (Previously presented) The method of Claim 11 wherein the translating comprises:
 - forming a link table in the second version; and
 - including information associated with the link in the link table.

20. (Previously presented) The system of Claim 23 wherein the reference specifies a different location within the paper, wherein the second location is the different location, and wherein the operation includes displaying the different location on the display device as part of the likeness in response to a selection of the first location.

21. (Previously presented) The system of Claim 23 wherein the reference specifies an identity of a script, wherein the second location is the script, and wherein the operation includes executing the script in response to a selection of the first location.

22. (Previously presented) The system of Claim 23 wherein the reference specifies an address of a website external to the paper, wherein the second location is the website, and wherein the operation includes displaying the website on the display device in response to a selection of the first location.

23. (Previously presented) A system, comprising:

a computing device for:

storing a first version of a mass-produced printed paper;

translating the first version into a second version of the paper, the second version being displayable on a display device as a likeness of the paper;

in response to the first version, detecting a reference at a first location within the paper, the detected reference being associated with a second location; and

in response to the detected reference, forming a link within the second version between the first location and the second location, and the first location being displayable on the display device as part of the likeness and selectable to cause an operation associated with the second location.

24. (Previously presented) The system of Claim 23 wherein the computing device is for translating the first version into the second version, wherein the translating comprises:

forming a link table in the second version; and

including information associated with the link in the link table.

32. (Previously presented) The computer program product of Claim 35 wherein the reference specifies a different location within the paper, wherein the second location is the different location, and wherein the operation includes displaying the different location on the display device as part of the likeness in response to a selection of the first location.

33. (Previously presented) The computer program product of Claim 35 wherein the reference specifies an identity of a script, wherein the second location is the script, and wherein the operation includes executing the script in response to a selection of the first location.

34. (Previously presented) The computer program product of Claim 35 wherein the reference specifies an address of a website external to the paper, wherein the second location is the website, and wherein the operation includes displaying the website on the display device in response to a selection of the first location.

35. (Previously presented) A computer program product, comprising:
a computer program processable by a computer system for causing the computer system to:
store a first version of a mass-produced printed paper;
translate the first version into a second version of the paper, the second version being displayable on a display device as a likeness of the paper;
in response to the first version, detect a reference at a first location within the paper, the detected reference being associated with a second location; and

in response to the detected reference, form a link within the second version between the first location and the second location, and the first location being displayable on the display device as part of the likeness and selectable to cause an operation associated with the second location; and
an apparatus from which the computer program is accessible by the computer system.

36. (Previously presented) The computer program product of Claim 35 wherein the computer program is processable by the computer system for causing the computer system to translate the first version into the second version, wherein the translating comprises:

creating a link table in the second version; and
including information associated with the hyperlink in the link table.

37. (Previously presented) The method of Claim 11 wherein the forming comprises:
forming the link within the second version, wherein the reference specifies an identity of a document external to the paper, wherein the second location is the document, and wherein the operation includes displaying the document on the display device in response to a selection of the first location.

38. (Previously presented) The method of Claim 11 wherein the forming comprises:
forming the link within the second version, wherein the reference specifies an identity of a file external to the paper, wherein the second location is the file, wherein the file includes visual image information, and wherein the operation includes displaying a visual image on the display device in response to the visual image information and a selection of the first location.

39. (Previously presented) The method of Claim 11 wherein the forming comprises:
forming the link within the second version, wherein the reference specifies an identity of a file external to the paper, wherein the second location is the file, wherein the file includes audio signal information, and wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location.

40. (Previously presented) The method of Claim 11 wherein the translating comprises:
translating the first version into the second version, the first version having a first digital format, and the second version having a second digital format.

41. (Previously presented) The method of Claim 23 wherein the reference specifies an identity of a document external to the paper, wherein the second location is the document, and wherein the operation includes displaying the document on the display device in response to a selection of the first location.
42. (Previously presented) The method of Claim 23 wherein the reference specifies an identity of a file external to the paper, wherein the second location is the file, wherein the file includes visual image information, and wherein the operation includes displaying a visual image on the display device in response to the visual image information and a selection of the first location.
43. (Previously presented) The method of Claim 23 wherein the reference specifies an identity of a file external to the paper, wherein the second location is the file, wherein the file includes audio signal information, and wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location.
44. (Previously presented) The method of Claim 23 wherein the first version has a first digital format, and the second version has a second digital format.
45. (Previously presented) The method of Claim 35 wherein the reference specifies an identity of a document external to the paper, wherein the second location is the document, and wherein the operation includes displaying the document on the display device in response to a selection of the first location.
46. (Previously presented) The method of Claim 35 wherein the reference specifies an identity of a file external to the paper, wherein the second location is the file, wherein the file includes visual image information, and wherein the operation includes displaying a visual image on the display device in response to the visual image information and a selection of the first location.
47. (Previously presented) The method of Claim 35 wherein the reference specifies an identity of a file external to the paper, wherein the second location is the file, wherein the file

PATENT

Serial No.: 09/690,367

Docket No. 28150.9

Customer No. 000027683

includes audio signal information, and wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location.

48. (Previously presented) The method of Claim 35 wherein the first version has a first digital format, and the second version has a second digital format.
